INTRODUCTION

INSTRUMENTATION FOR MAGNETIC FIELD MEASUREMENTS

Instrumentation for measurement of stellar magnetic fields
with the 6-m telescope: Yu. V. Glagolevskij, V. D. Bychkov,
V. G. El'kin, E. B. Gazhur, A. F. Nazarenko, I. D. Naidenov,
I. I. Romanyuk, G. A. Chuntunov, V. G. Shtol' 12

First measurements of 4 Stokes parameters with the 6-m
telescope: Yu. V. Glagolevskij, V. G. El'kin, I. I. Romanyuk,
V. G. Shtol' 22

The catalogue of hydrogen line profiles of Balmer series
 H_{α} , H_{β} , H_{γ} , H_{δ} : V. D. Bychkov, T. V. Doroshenko, S. A. Chekh .. 26

The estimation of 53 Cam magnetic field value by means
of spectral line width analysis: Yu. V. Glagolevskij,
V. G. El'kin, I. I. Romanyuk, N. E. Piskunov 32

The bank of observational data for chemically peculiar stars:
V. S. Lebedev 36

RESULTS ON MAGNETIC FIELD MEASUREMENTS

A surface magnetic field study of Ap star 78 Virginis:
T. A. Ryabchikova, E. S. Davydova, D. Z. Kolev 40

Modern state of magnetic field investigation in β Lyrae:
M. Yu. Skulskij 47

An investigation of magnetic field strength variation in
RR Lyrae: Yu. S. Romanov, S. N. Udovichenko, M. S. Frolov ... 51

The measurements of the magnetic field of β he star CrB
in λ 4234.33 A Cr I line: S. I. Plachinda 54

A simple model of CQ UMa: Z. Mikulasek 67

Magnetic fields of supergiants: E. Gerth 78

Magnetic field measurements of the lambda Bootis type stars: HD 210418: I. Kh. Iliev, I. S. Barzova, Yu. V. Glagolevskij, V. D. Bychkov, V. G. El'kin, I. I. Romanyuk, V. G. Shtol	87
52 Her - magnetic variations due to precession? : H. Lehmann..	89
The magnetic field of Epsilon UMa: S. Hubrig:	95
SPECTRA AND CHEMICAL COMPOSITION OF MAGNETIC STARS	
The awful CP star HD 51418: I. Kh. Iliev, I. S. Barzova	98
Spectrue variations of the CP 2 star HD 5797 = V 551 Cas: I. S. Barzova, I. Kh. Iliev..	107
Search for rapid variability in spectrue of ϵ Andromedae: J. Zverko, J. Ziznovsky, N. Zboril, L. Hric, N.S. Polosukhina, V. P. Malanushenko, V. D. Bychkov, I. Iliev, I. Barzova	110
Chemically peculiar binary Omega Ursa Majoris with elliptical orbit: L. Hric.....	111
The new helium-weak star HR 446: L. Hric.	112
Spectrophotometric investigations of magnetic variable star AF Dra: Z. N. Fenina, N. S. Zgonyajko.....	118
Cheecal composition of υ Sgr: V. V. Leushin, G. P. Topil'skaya.....	120
Analysis of the spectrue of Hg-Mn star HR 4072: V. M. Dobrichev, D. V. Rajkova, V. G. Klochkova, V. E. Panchuk.....	122
Abundance analysis of Hg-Mn star ψ Herculis: T. A. Ryabchikova, N. E. Piskunov.	124
An impossible reason of origin of chemical anomalies in CP stars: V. V. Leushin, G. P. Topil'skaya ..	139
Quantitative spectral peculiarity indexes of CP stars: I. M. Kopylov.	159
Iron and Titanium abundance in the atmosphere of chemically peculiar stars: I. M. Kopylov.....	160
The abundances of carbon, nitrogen, and oxygen in the atmospheres of metallic-line stars: I. S. Savanov.....	161

On the character of variability of radial velocities of helium lines in the spectrum of ϵ Ori E: V. L. Khokhlova, D. A. Ptitsyn, A. G. Totochava, E. Zelvanova	167
Remarks on spectroscopic and speckle interferometric system parameters of the binary 53 Camelopardalis: G. Scholz	170
PHOTOMETRY. VARIABILITY.	
The narrow-band photometry of the magnetic Ap star γ Equ: V. I. Burnashev, V. P. Malanushenko, N. S. Poiosukhina	173
The investigation of the atmosphere of the mercury-manganese star α And: L. S. Lyubiekov, N. S. Poiosukhina	183
Phase variations of the beta index in Ap stars: B. Musielok, J. Madej.....	184
Light time effect in AR Aur: J. Ziznovsky, J. Zverko, K. Jusa, D. Chochol, P. Mayer.....	189
On the peculiar light curve of HD 56022: A. Hempelmann. . .	191
The light variability of the magnetic Ap star 52 Herculis (HD 152107): N. Schoneich, E. I. Zelvanova, B. Musielok....	193
Detection of non-radial pulsations of stars with an inhomogeneous surface distribution of chemical elements: D. E. Mkrtichian	195
A study of γ Equ radial velocity variations using the selected elements: V. D. Bychkov	197
THEORY. MAGNETIC FIELDS IN THE UNIVERSE.	
ORIGIN AND EVOLUTION OF MAGNETIC FIELDS.	
On the concentration of magnetic monopoles in the Universe: M. Yu. Khlopov.....	201
Problems of magnetic field origin and evolution in chemically peculiar stars: Yu. V. Glagolevskij.....	206
Possible nonequilibrium structures on magnetic stars: A. Z. Dolginov.....	220
Fossil magnetic field of chemically peculiar stars: A. E. Dudorov.....	226
A scenario for dynamo generated magnetic fields: F. Krause, R. Meinel	236

CP stars interaction with interstellar gas:	
S. N. Fabrika, V. D. Bychkov.....	241
Helical HBD dynamo model experiment: A. Gailitis.....	255
On the magnetic field origin of Ap stars:	
A. E. Dudorov, A. V. Tutukov.....	259
Influence of the chemical composition on the convection, meridional circulation and differential stellar rotation:	
A. Z. Dolginov, A. V. Klyachkin.....	264
Diffusion and correlation of magnetic field in a turbulent medium: N. A. Silant'ev	281
Correlations of scalar field in the stochastic medium:	
A. Z. Dolginov, N. A. Silant'ev.....	297
The influence of the surface curvature on the convection threshold in stars: A. V. Klyachkin.....	311
On the cyclicity and amplitude of the activity of rotating stars: N. I. Kleeorin, A. A. Ruzmaikin.....	321
